

**My
Summer
Workbook**

**OPS
2021**

Dear families of **almost** kindergarteners,

Though summer break is only a few months along, it is still very important to maintain the incredible academic and personal skills your child has learned and worked so hard on this year. Summer Slump occurs when students lose skills over the summer by not continuing to practice them outside of the classroom walls. Summer is also a great opportunity to practice new skills your child may not have mastered yet.

Inside this packet, you will find a variety of activities that will help your child get ready for their big kindergarten year! Revisit activities that your child may not be strong in. Lots of practice over the summer will make for a stronger start next school year.

Remember, play is also important for your child to learn! It is encouraged for your child to have authentic play experiences this summer- especially away from screen time! Encourage your **almost** kindergartener to read books, play outside, pedal a tricycle, draw pictures, build blocks, create with playdough, and pretend play!

Have a wonderful summer!
